

# Blue Twisted Form

This activity has been designed as a starting point for looking, talking and doing together. The **Look** and **Think** activities should take 5 -10 minutes.

The **Do** activities might take longer depending on the task and how creative you are feeling!

## Blue Twisted Form, Merete Rasmussen

2012, Stoneware

31.1 x 57.5 x 52.5 cm

Presented by Nicholas and Judith Goodison

This work is an excellent example of Rasmussen's fluid ceramic forms, with a pleasing asymmetric construction and striking colour.

### Look

Look carefully and see if you can work out how this object was made and from what material.

### Think

What do you think? Do you like it? Does it remind you of anything?

### Do

It is amazing to think that this sculpture is one continuous form. If you follow its twists and turns carefully you will see it only has one side. This is known as Möbius Strip.

Cut the edge off a side of paper. Label A and B on the left corners, C and D on the right.

Twist your paper in the middle. Bring the ends around to meet each other and match up corner A with C and B with D.

Sellotape the strip together.

Test your strip using a pencil. Follow it all the way along without taking your pencil off the paper. You will eventually mark all the way along both sides!
